DETAILED ACTION

Election/Restrictions

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-11 and 14, drawn to a medicament or agent having a cytokine suppression effect.

Group II, claim(s) 12, drawn to the use of riboflavin for the preparation of a therapeutic agent for hypercytokinemia.

Group III, claim(s) 13 and 15, drawn to the use of riboflavin as a therapeutic agent for hypercytokinemia.

The inventions listed as Groups I-III do not related to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the use of riboflavin for the suppression of cytokines is not novel (see US Patent No. 203/016187 to Hird et al. which describes the use of riboflavin to treat sepsis.). For the foregoing reasons, the holding of lack of unity amongst the inventions of Groups I-III is proper.

A telephone call was made to Counselor El-Hayek on 26 November 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
